

Societies Under Siege

Exploring How International Economic Sanctions (Do Not) Work

Lee Jones, Queen Mary, University of London

- Provides a comparative analytical framework for how sanctions operate
- Draws on previously unused interviews, archives and diplomatic cables, including internal records of Saddam Hussein's regime
- Covers comprehensive and targeted sanctions across three iconic case studies

Today, international economic sanctions are imposed in response to virtually every serious international crisis, whether to promote regime change and democratisation, punish armed aggression, or check nuclear proliferation. But how exactly is the economic pain inflicted by sanctions supposed to translate into political gain? What are the mechanisms by which sanctions operate - or fail to operate? This is the first comparative study of this vital question.
